

Amphenol FCI India, a part of Amphenol Corporation, specializes in the manufacture of technologically advanced connectors, innovative cable assemblies (Copper & Fiber Optics) and Network solution (AFNS) products

## About Us

- 30+ successful years in India
- Largest fully integrated manufacturing facility in India
- Sales offices in major cities
- Distribution partners across India
- Highly skilled and experienced staff
- Global design support
- Innovative technology
- Lean manufacturing
- Quality ownership
- Timely delivery

## AFNS

*Your trusted partner for end to end structured cabling and high speed fiber optic interconnect solutions*

As a global leader in interconnect solutions and network connectivity systems, Amphenol FCI provides both standard and customized passive network solution products to the market. Our commitment to the stringent management of our supply chain and manufacturing focus enables us to consistently deliver the highest quality, high performance products and solutions to our customers.

Amphenol FCI offers an extensive range of ICT product and solutions, including end-to-end structured cabling solutions, High performance and high density Data center solutions, FTTH, Outside plant fiber campus connectivity solutions, PLC Splitters, and other customized products for ICT applications on demand

Amphenol FCI works closely with the industry experts to constantly develop new products and technology solutions and makes customer satisfaction their top priority.

Amphenol FCI's quality system is certified to ISO 9001:2015 and ISO 14001:2015 standards. All passive components are RoHS compliant

*Your trusted partner for end to end structured cabling and high speed fiber optic interconnect solutions*

## **AFNS (Amphenol FCI Network Solutions) Product Portfolio:**

- Structured Cabling Solutions
- Fiber Distribution Solutions for FTTX
- Fiber Rack Solutions
- Fiber Accessories
- Fiber PLC Splitters
- Data Center Fiber Solutions
- Industrial Passive Network Solutions
- Optical Transceiver Modules
- Network Racks & Enclosures

## STRUCTURED CABLING SOLUTIONS

Products: End to End Cat6 UTP & STP solutions, Cat6A UTP & STP solutions and Cat7A STP solutions

Xgiga speed Single mode & Multimode (OM3, OM4 & OM5) cable & connectivity solutions

Markets: Enterprise Ethernet, Data Center & Industrial applications

STRUCTURED CABLING SOLUTIONS

Cat7A S/FTP cables

Cat6A U/FTP cables

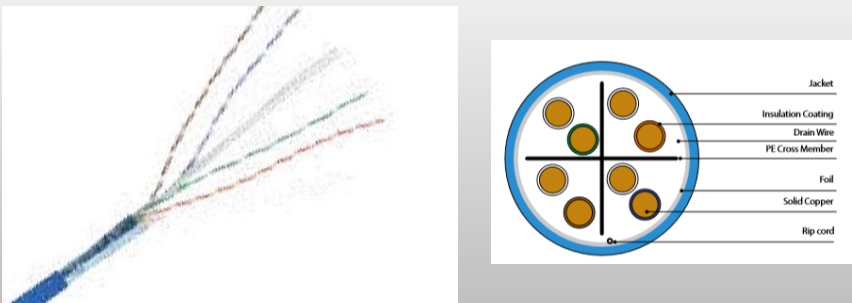

Cat7 S/FTP cables

Cat6A U/UTP cables

Cat6 F/UTP cables

Cat6 U/UTP cables

## STRUCTURED CABLING SOLUTIONS

### AFNS RJ-45 Patch cords

#### Features:

- High grade 50μ inch gold plated RJ45 connector pins
- Cat 6 & Cat6A
- UTP & STP
- Injection moulded boot for improved strain relief
- Soft latch-cover design for easy depression
- Transparent Boot
- Available in LSZH and PVC jackets
- Available in 5 colours

#### Commercial Standards:

ISO/IEC 11801 : 2002

ANSI/EIA/TIA 568C.2

IEC 60332-1

## STRUCTURED CABLING SOLUTIONS

### AFNS RJ-45 Patch Panels

#### Features:

- 24P & 48P UTP
- 1U & 2U Panels
- With Integrated Rear Cable Manager
- Available in Unloaded and loaded options
- Straight and angular type
- CRS construction
- UTP & STP
- Compatible with Keystone IO Jacks
- Angular type panel minimizes patch cord bend radius

#### Commercial Standards:

ISO/IEC 11801 : 2002

ANSI/EIA/TIA 568C.2

RoHS Compliant

## STRUCTURED CABLING SOLUTIONS

### AFNS RJ-45 Keystone IO jacks & Faceplates

Features: IO's

- High grade 50μ inch gold plated RJ45 IDC
- Unshielded & shielded
- Punch down type and Tool less type
- Unshuttered and Shuttered
- Zinc Die-casting with high quality Nickel plating for the housing of shielded IO Jacks
- Plastic Parts : High impact flame retardant plastic, UL 94V-0

Features: Faceplate

- Two Piece design
- Shutter on Face Plate
- Elegant hidden-screw design
- Robust and Installer Friendly Design

Commercial Standards:

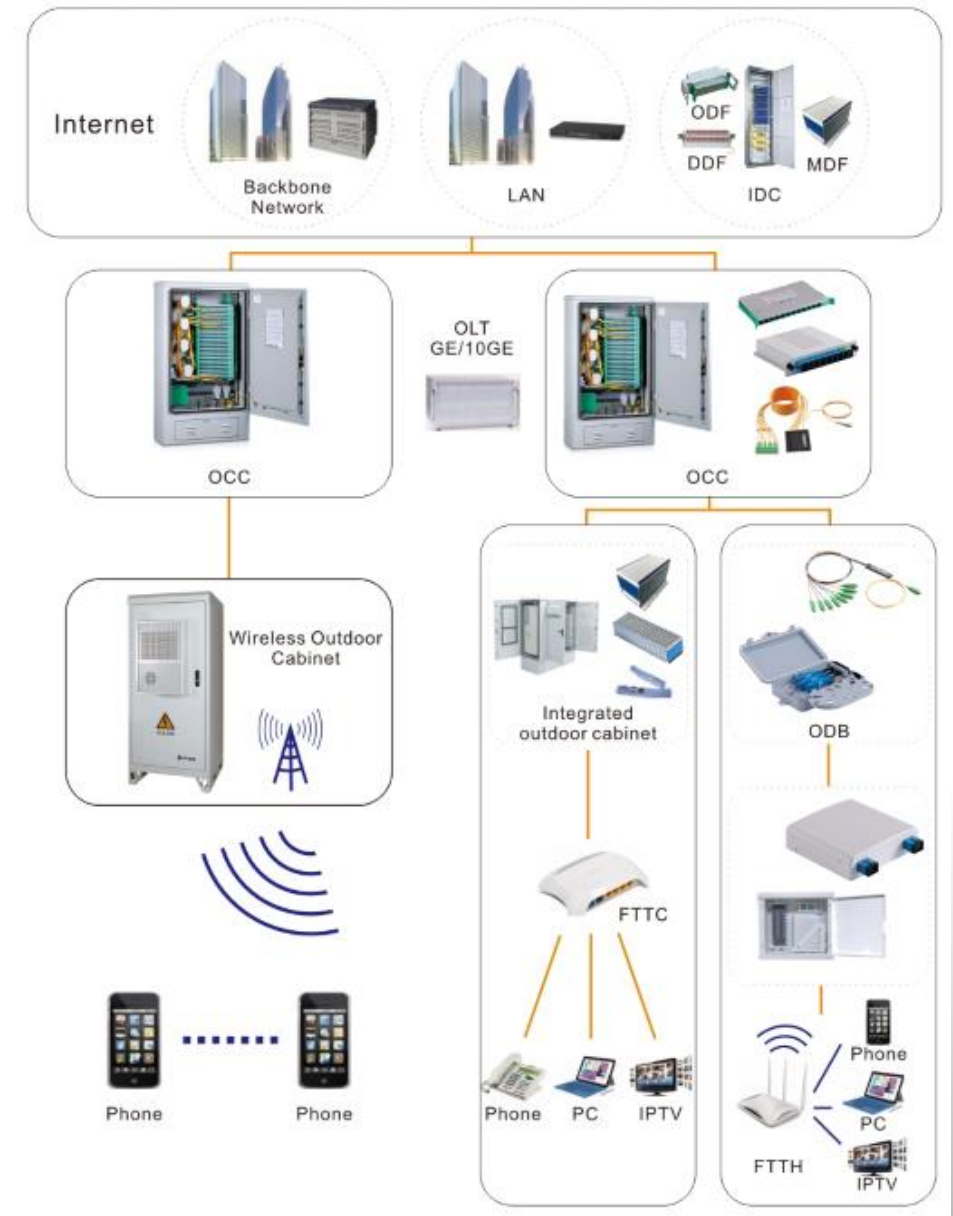

ISO/IEC 11801 : 2002

ANSI/EIA/TIA 568C.2

RoHS Compliant

FIBER DISTRIBUTION SOLUTIONS

## FIBER DISTRIBUTION SOLUTIONS

### Fiber Hub Terminals

Fiber Interconnect Terminal Hubs – Outdoor applications

Up to 48F

Up to 96F

Fiber Building Terminal Hubs – Indoor applications

Up to 48F

Up to 96F

Up to 144F

Up to 384F

## FIBER DISTRIBUTION SOLUTIONS

### Fiber Distribution Hub (FDH)

FDH – Outdoor applications

**FDH 288F**

**FDH 288F SPLICE SIDE**

**FDH 288F  
DISTRIBUTION SIDE**

## FIBER DISTRIBUTION SOLUTIONS

### Fiber Terminals Box (FTB)

FTB – Indoor/Outdoor applications

FTB – Compact

**FTB COMPACT TYPE -  
EMPTY**

**FTB COMPACT with  
24F fiber terminal and  
swing out**

FTB – Standard

**FTB STANDARD TYPE -  
EMPTY**

**FTB STANDARD with 72F Fiber  
Terminal and Swing Out**

## FIBER DISTRIBUTION SOLUTIONS

### Fiber Terminal Box – For Low/Medium Density Fiber Circuit

**4/6/12 Port FTB**

**12/24 Port FTB**

**24/32/48 port FTB**

- Ideal for Fiber to the Home (FTTH) and low density fiber circuits
- Serves as a demarcation point for fiber entry ( customer premises)
- Provides organized fiber slack storage
- Choice of SC or LC Adapters available
- PVC or ABS Material construction and hex bolt or key lock for security

## FIBER DISTRIBUTION SOLUTIONS

### Fiber Terminals – Splice Closure

**Dome Enclosure – IP 68**

**Splice Enclosure Hinge type IP-68**

AFNS Outdoor splice closures are designed to protect fiber cable splices for various outside plant applications.

- These closures can protect fiber splices and ensures high reliability with application in ambient temperature range from -40 Deg C to +65 Deg C
- Can be installed in aerial, bracket, underground or duct.
- Suitable with most cable constructions – loose tube, skeleton and ribbon type cables
- No special tools required for installation
- IP-68 protection – integrated seal, air tight and water tight
- UV and chemical resistant

**Splice Enclosure – Inline type**

**Splice Enclosure – Wall mount/Pole mount**

## FIBER DISTRIBUTION SOLUTIONS

### Optical Distribution Frame (ODF)

- Optical Distribution Frames are designed to handle termination and cross connection of cables .We offer optical distribution frames of up to 720 Ports ( 46U) .
- These are mainly used as the interface between optical transmission network, optical transmission equipment and between optical cables in access network of optical fiber
- Optic Distribution Frame is suitable for large capacity wiring requirement, such as FTTX local or branch point, can be configured with optic splitter modules, easy to achieve optic splitting.
- Can be customized according to the number of customer core.
- Double sided front door for ease of management .
- Made of high quality steel .

## FIBER DISTRIBUTION SOLUTIONS

### Optical Distribution Frame (ODF)

The ODF adopts splice module which is often used in central office, access office to realize the connection and scheduling function between the external fiber optic cable and communication equipment

## FIBER RACK SOLUTIONS

**1RU 24 Ports**

**Front Access Panel (3 LGX Module Slots)**

**2RU 48 Ports**

**4RU 144 Ports**

- AFNS Fiber Rack solutions provide flexible, multi functional panels for patch, splice and splitter requirements
- Available in 1RU, 2RU, 4RU and 6RU of valuable rack space.
- Feature Cold rolled steel construction with powder coated finish
- Compatible with 19" and 23" AFNS equipment racks

## FIBER ACCESSORIES

**SC/APC Bulkhead Adapters**

**SC/UPC Bulkhead Adapters**

**SC/APC Attenuators**

**SC/UPC Attenuators**

**LC/UPC Attenuators**

**LC/UPC Duplexed Adapters**

**Patch Plates**

- AFNS offers a wide assortment of high quality fiber optic accessory products for integrations with fiber enclosures, terminals, FDH and rack solutions.
- All products are built to stringent industry standards for low optical signal loss and reliable performance

FIBER ACCESSORIES

- Standard patch cords
- Uni-boot patch cords
- Flex Boot Patch cords
- Armored Patch cords
- Mode conditioning patch cords
- Multi fiber fan out assemblies
- Pigtails
- Bend insensitive patch cords
- Premium low loss patch cords
- Telecom pigtails
- Short boot, angled 90 deg boot and standard boot design
- Available in standard and customized lengths

Rodent Protected Armored Cable Assembly

## FIBER PLC SPLITTERS

### Bare Fiber

- Has Bare Fiber on all ends

### Mini/Block less

- Has 900 micron Fiber on all ends

### ABS Casing

- Has Jacketed fiber cable on all ends

### Cassette

- PLC incorporated in Cassette

### Rack Mount

- PLC incorporated in 19inch Rack

**Compact Design ; Low insertion loss and PDL ; High Reliability; Wide Operating Wavelength Range**

### Qualification Standards:

**Telcordia GR1209 & GR-1221** standards outline the generic criteria for passive optical components to ensure continuous operation of the components over its lifetime.

The environmental and mechanical tests outlined in the **GR-1209** standard is designed to demonstrate the short term operational performance of a passive optical component. The normal lifespan of an FTTH network is at least 25 years, thus it is recommended for the environmental and mechanical test criteria to be based on the **GR-1221** standard.

- PLC incorporated in wall /pole outdoor/indoor box

FIBER PLC SPLITTERS

Parameters	1X2	1x4	1x8	1x16	1x32	1x64	2X2	2x4	2x8	2x16	2x32	2x64	Unit

## DATA CENTER FIBER SOLUTIONS

### MPO –LC High Density Solution

- We do support High density MPO/MTP- LC panels 96 F( 1U) , 144 F(1U) , 288 F(3U)
- 19" standard structure
- 24 Fibers standard LC- LC-MPO/MTP® cassettes
- Compatible LC/MPO/MTP® adapters
- Perfect optical fiber modular management
- Easy to install

### Copper & Fiber Hybrid Patch Panel

- Fiber and copper integrated patch panel is a 19" 19" standard structure with 1U to realize the integrated cabling management of various modules such as RJ-45/MPO/MTP®/LC/SC cassettes to realize 144F cabling
- 19" standard structure
- Integrated cabling management for fiber and copper modules
- Excellent fiber and copper management
- Revolving front panel structure for convenient maintenance and marking
- RJ-45/MPO/MTP®/LC/SC modules available

## DATA CENTER FIBER SOLUTIONS

### MPO/MTP Assemblies

AFNS MTP/MPO Cable assembly Solution is a highly reliable and cost effective structured cabling system from migrating from legacy 10G to higher speed 40G/100G Ethernet with OM3, OM4 & OM5 fiber Cables .

- Polarity management options in accordance to TIA methods A,B or C.
- Choices of laser optimized multimode OM3 and OM4 fibers
- Easy installation and slack management
- MTP/MPO in Interface for 40G QSFP and 100G CXP transceivers

### MPO/MTP Loop Back

AFNS Loop back helps to check the fiber optic connectivity links before the full operation. This could determine the incorrect interconnection and reduce the significant OPEX budget. Device burn-in and testing of QSFP modules prevents the malfunction of the whole optical link.

## DATA CENTER FIBER SOLUTIONS

### MPO/MTP LC Fan out Assemblies

- Factory terminated and Tested
- High density , Installer friendly designs
- Choices of MTP/MPO Cable in 12F or 24F connector interface
- Optional Pulling Eye Design
- Available in Single mode ( OS1/OS2 ) and Multimode
- (OM1, OM2, OM3, OM4 & OM5)
- Available in standard and custom lengths.

### Breakout Assemblies

AFNS provides SM and MM LC and SC Break out solutions which helps the interconnection between the racks .

## INDUSTRIAL SOLUTIONS

### DIN Rail Solution

Amphenol FCI's Mini DIN rail type fiber optic wall enclosures are designed to support and secure fiber terminations in industrial environments. This enclosure includes a splice tray for fusion splicing. Available in both single mode and multimode fiber connector types. Fully Customized against Customer Application

### POF Assemblies

We offer highly reliable, cost-competitive Plastic Optical Fiber (POF) cable-assembly and harnesses solutions to catering to segments like industrial, medical, renewable-energy, power transmission and distribution, transportation and consumer applications including controls, drives, factory automation, high-speed trains, sensors and imaging. Customers are provided a choice to specify assemblies and harnesses in terms of connector types, jacket material and color, temperature range, cable lengths and tolerances

- Fully Customized against Customer Application
- Industrial and Elevated Temperature ranges

## INDUSTRIAL SOLUTIONS

### RJ-45 Field Attachable Connector

#### Specifications

Cat6 Compliant

IP67

UV Stabilised

Op Tem -40/+85 Degree C

Plastic Moulded - Black

### IP 68 Water Proof Cable

- IP 68 dustproof and water proof in harsh environment
- Simple to assemble and easy to connect
- Chemical resistance
- Operation temperature: -40 Deg C to +80 Deg C
- IP-68 Rated

## OPTICAL TRANSCEIVER MODULES

We ( Amphenol XGIGA ) offer comprehensive optical communication module product combination, data rate from 155M to 100G, form factor .

Our Products:-

**SFP,SFP+,  
XFP,SFP28,  
QSFP+,CFP,  
CFP2,CFP4  
QSFP28  
AOC**

## OPTICAL TRANSCEIVER MODULES

### 10G Transceivers

## OPTICAL TRANSCEIVER MODULES

### 25G/50G Transceivers

QSFP28 ER

QSFP28 LR

SFP56 SR

50G

SFP28 ER(40km)

SFP28 ER LWDM (40km)

## NETWORK RACKS & ENCLOSURES

### Floor Mount Network Rack

AFNS floor mount racks are specially designed for Networking, and Data center applications.

AFNS floor mount intelligent racks are made of heavy-duty aluminium vertical profiles and with cold rolled steel sheet and proceeded with CNC. punching, forming, welding and powder coated to meet Industrial, ISO 9001-2015 and 140012015 standards. All product manufactured by Amphenol FCI conforms to or exceeds UL standards and relevant international requirements and tests.

### Wall Mount Network Rack

Amphenol FCI offers a range of single section wall mount racks to suit small secured network requirements. Wall mount racks are the ideal solution where the floor space is a limitation, Typical networking equipment like routers, switches, and patch panels can easily accommodate in the rack.

Single section wall mount racks are fabricated out of CRCA steel sheet CNC programmed, punched, bent, welded and powder coated with highest quality under confirming Industrial, ISO 9001-2015 and 14001-2015 standards. Manufacturing and quality management systems to ensure highest quality product.

ENGINEERING SUPPORT

Design & Development Tools

- PACE ® Methodology for Product Development
- Use Pro Engineer Creo for Design 3D modeling
- Autocad , Cocreate 2D
- Mould flow Analysis for Plastic parts
- Pro Windchill PDM Link for Product Data Management
- QAD for BOM Maintenance and Product Costing
- Simulation & Prototype Capability

THANK YOU!
